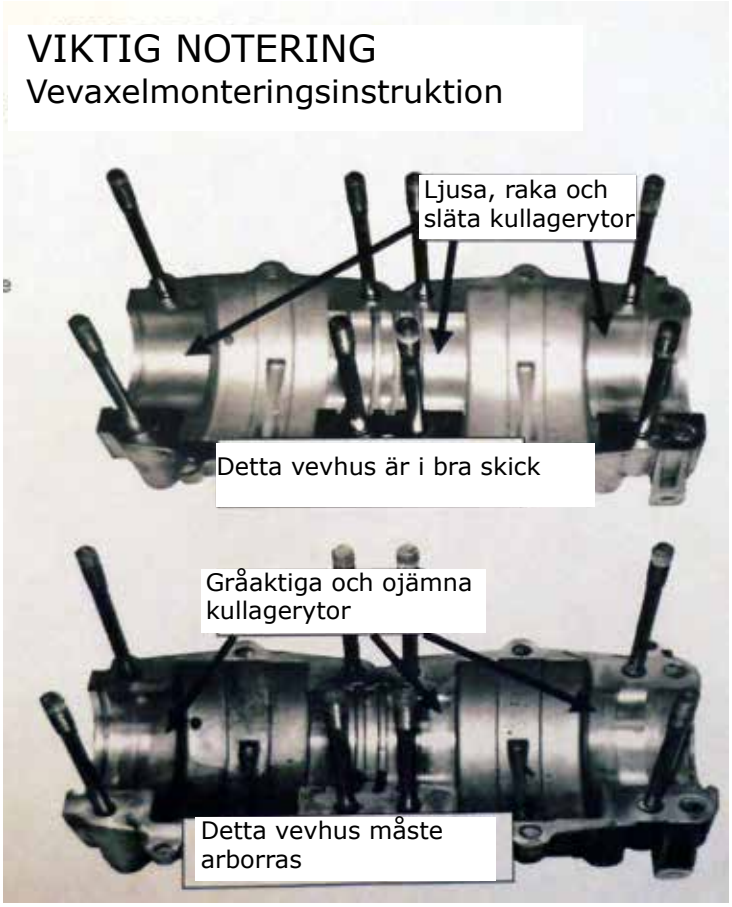
Viktiga noteringar om vevaxelmontering

Viktigt:
Vid vevaxelmontering hänvisas alltid till tillverkarens verkstadshandbok .
Innan vehusets bultar dras åt, kontrollera att vevaxeln, dess kullager och vevaxeltätningar passats in korrekt i vevhuset .
Innan och efter åtdragning av vevhusets bultförband, kontrollera att vevaxeln lätt kan roteras.
Följ alltid verkstadshandbokens instruktioner beträffande kullagrens infettning/smörjning.
Kullagrens livslängd beror helt på om de smorts på rätt sätt med rätt typ av smörjmedel

Inkörning:
Det finns ingenting viktigare för att få optimal livslängd i en motor än rätt typ av inkörning. Belasta aldrig motorn maximalt under de 10 första timmarna. Kör lungt med varierat gaspådrag. Utsätt aldrig motorn för långa fullgaskörningar och/eller hög belastning. Avbryt körningen om onormalt ljud eller vibrationer uppstår. Analysera och åtgärda orsaken innan körningen fortsätter

Garanti:
Renoverade standardkomponenter har en garantitid om ett år med början från fakturans datum. Komponenterna skall vara monterade av fackkunnig och utbildad personal.



Boggiehjul

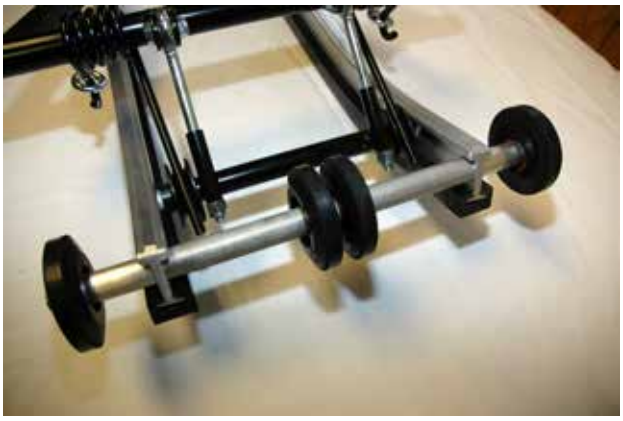
Hjul inserts

20-34 hylsa 3/4 " par

20-58 hylsa 5/8 " par

Boggi fronthjulsats



Stab hjulsats bidrar till att förhindra skador på mattan genom att eliminera risken för att boggiskenornas spetsar kommer i kontakt med mattan

39-791 **Center, 223 mm axel Arctic Cat, Yamaha**

39-793 **Center, 220 mm axel Skidoo, Polaris, Lynx**

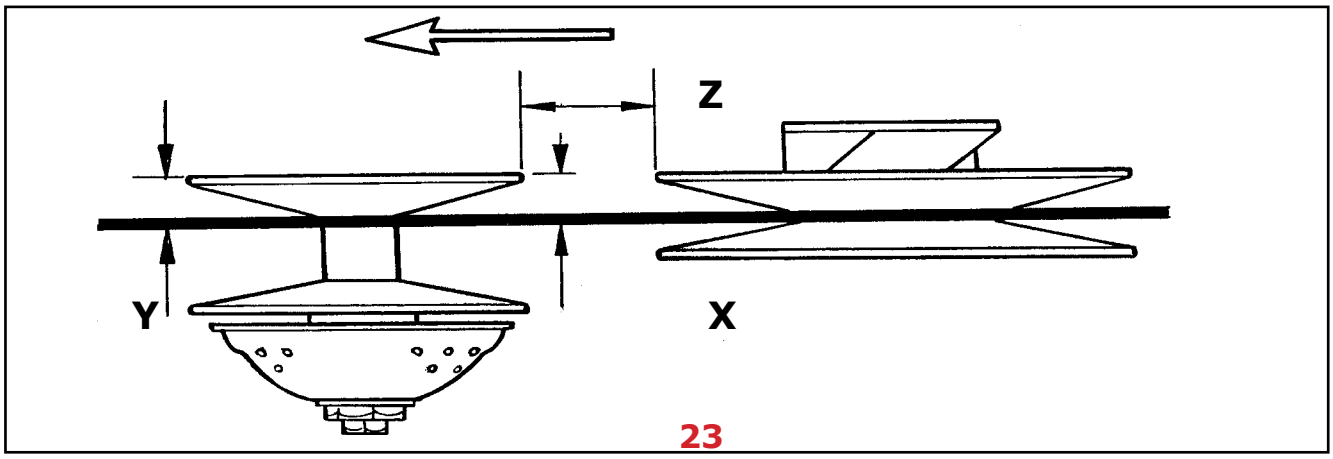
När du har monterat i en ny variator eller reparerat den gamla, kolla alltid fjädern i sekundärvariatorn. Väldigt ofta är den för svag och fungerar inte som den ska.
Den växlar upp för tidigt och växlar ner för sent vilket gör att motorn inte orkar. Därför lönar det sig att spänna den gamla fjädern eller montera dit en ny. Du bör också alltid rengöra delarna.

Linjering
Kolla variatorernas linjering med en rak stång. Om det inte finns någon vridstopp eller begränsare i din skoter, som hindrar att motorn vrider sig under drift, så måste måttet **Y** vara minst 1,0-1,5 mm större än måttet **X**. Notera också att ny CVTech, IBC är mindre i diameter och därför är ägarhandbokens **Z** mått ej rätt.



Powerbloc 80

Servicefri variator till stora vätskekylda maskiner. Den är mycket driftsäker och innehåller inga slitande delar. Man kan montera original startkrans.

Variatorn levereras färdigkalibrerad.

Bilden i höger: Samma variator, men den har gått 700 mil. Inget slitage, samma fjäderlängd som i den nya, viktblocken är som nya och skivorna helt korrekta. Den ursprungliga drivremmen med bredd av 35 mm.
Summit 600 SDI.

Dessa fjädrar man kan använda också i P80 variatoren						

Den blå fjäderns konstant är något högre på maxvarv än CVTech fjäderns. Kalibrering kan ändras genom att lägga till viktbricka i varje viktblock Kom i håg: en bricka motsvarar ungefär 100 varv /min. Om motorns max varvtal avviker det som fabriken angett för den aktuella motortypen bör man även kontrollera sekundärvariatorns fjäderförspänning och variatorernas linjering.
Motorns prestanda blir aldrig bättre än variatorernas kalibrering tillåter.

Shortblock, kit

Tillgängliga med kort leveranstid

Short block inkluderar:
- Renoverat vevhus
- Nya kolvar
- Renoverad vevaxel
- Ny cylinderbeläggning
- Nya packningar
- Nya kullager
- 0,5 l inkörningsolja
- Slidmatningsaxel (i aktuella fall)
- Notera: Priset inkluderar inte utbytesstommen

Renoverade vevaxlar

Renoverade vevaxlar:
- samtliga kul/rullager
- mittre packboxar
- vevstakar
- riktade enligt originalspecifikationer
- 1-års garanti
- Med kullagerfett (i aktuella fall)

NEW COBRA WT

New COBRA WT600

The Camoplast Cobra WT is a no-compromises solution for off-trail work and play.

- Extra tall 1.5″ and 1.8″ lugs provide optimal traction on and off-trail applications
- Cupped lugs deliver excellent traction in soft, loose snow and off-trail
- back country explorations
- Lightweight for improved efficiency and fuel economy
  High-performance belting pulls heavier loads without track stretching

CHALLENGER 3 NEW

- Full 3″ tall lugs provide unmatched traction for boondocking in the most extreme bottomless powder
- Lug geometry and support columns allow lug cup and flex action for unmatched floatation
- Single ply construction, 3″ drive pitch and advanced molding technology make it the lightest in its category

CHALLENGER

- Benchmark Challenger lug design is versatile for all around performance in a wide range of mountain riding conditions
- 2″ and 2.313″ lugs provide good traction for moderate boondocking and off-trail riding
- Saw-tooth lug feature provides traction and grip on hard, wind-blown and springtime snow

PEAK 2.5

2.5″ lug height for traction in bottomless powder and high peak climbing

- Angular lugs bite big and funnel snow under the snowmobile for outstanding performance
- Outer lug bars deliver better lateral control for improved handling
- Multi-durometer outside lug configuration for outstanding performance in ALL snow types and conditions

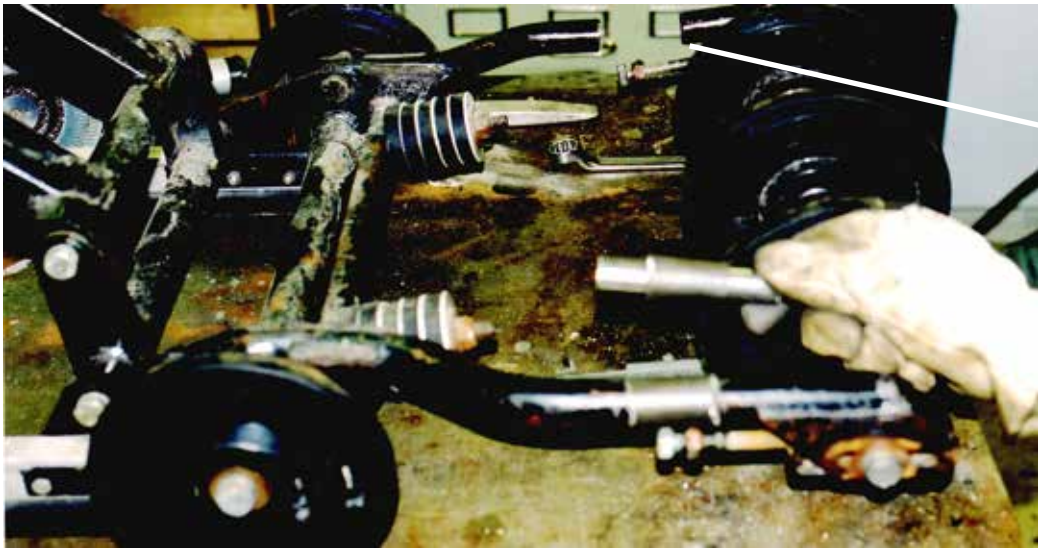
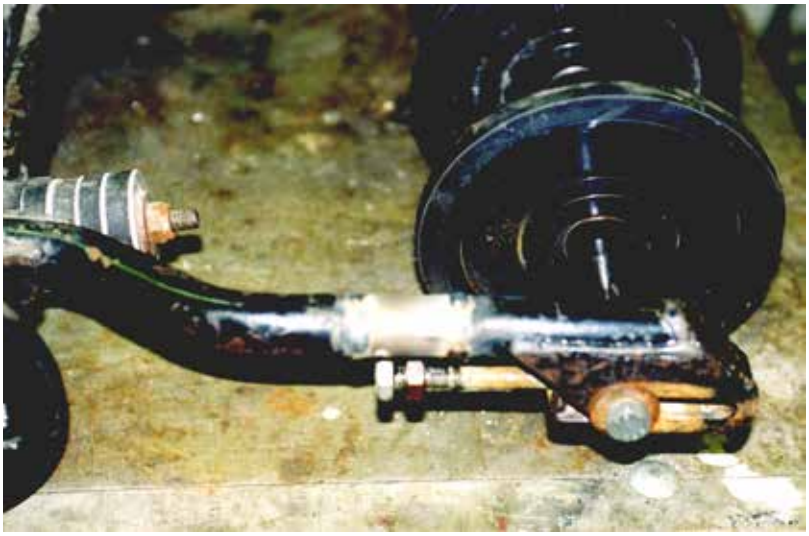
Camoplast har lagt ned sin finländska snöskoterdrivbandsproduktion. Detta innebär att tillverkningen av de drivband som varit unika för de finska och svenska snöskotrarna, har avslutats. Bl.a. Lynx, Winha, Trapper, Nordik och Ockelbo. En sista tillverkningsomgång av dessa drivband har skett under sommaren 2010.

Lynx 5900 byte av matta samt förlängning på bakparti.



Kapa av röret

Svetsa ihop med rörbiten Rörbitarna levereras med mattan.



Svetsen har gjorts
Denna skoter har runda bak hjul. Du kan ersätta även de bakre kugghjulen, om det existerar.

Du måste byta även drivhjulen. Det är endast möjligt om det finns en sexkantig drivaxel.

Vi rekommenderar No Slip hjul

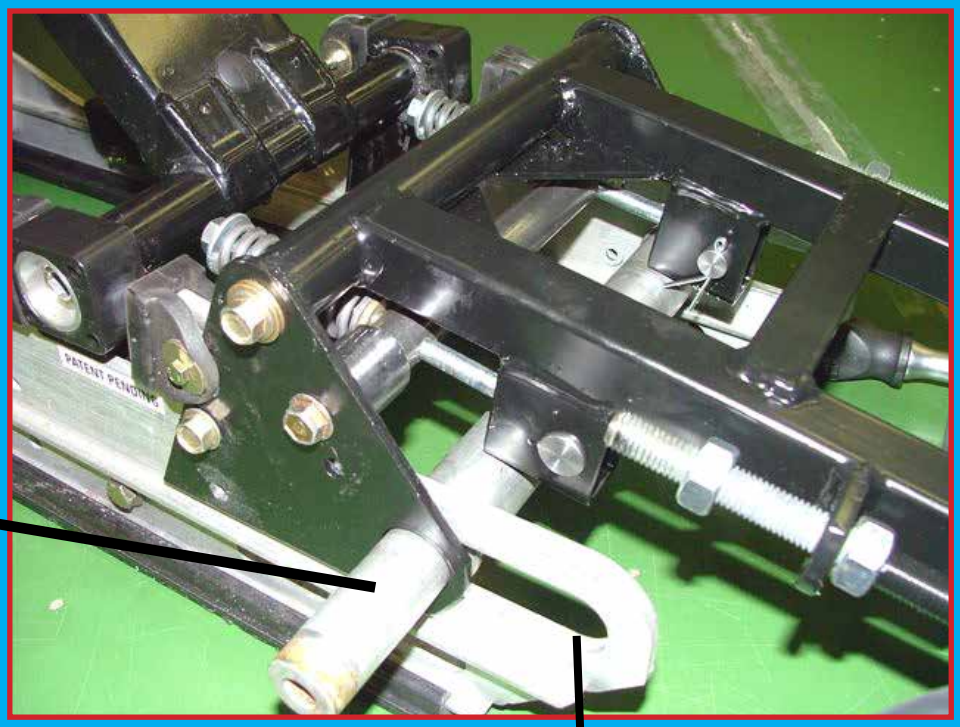
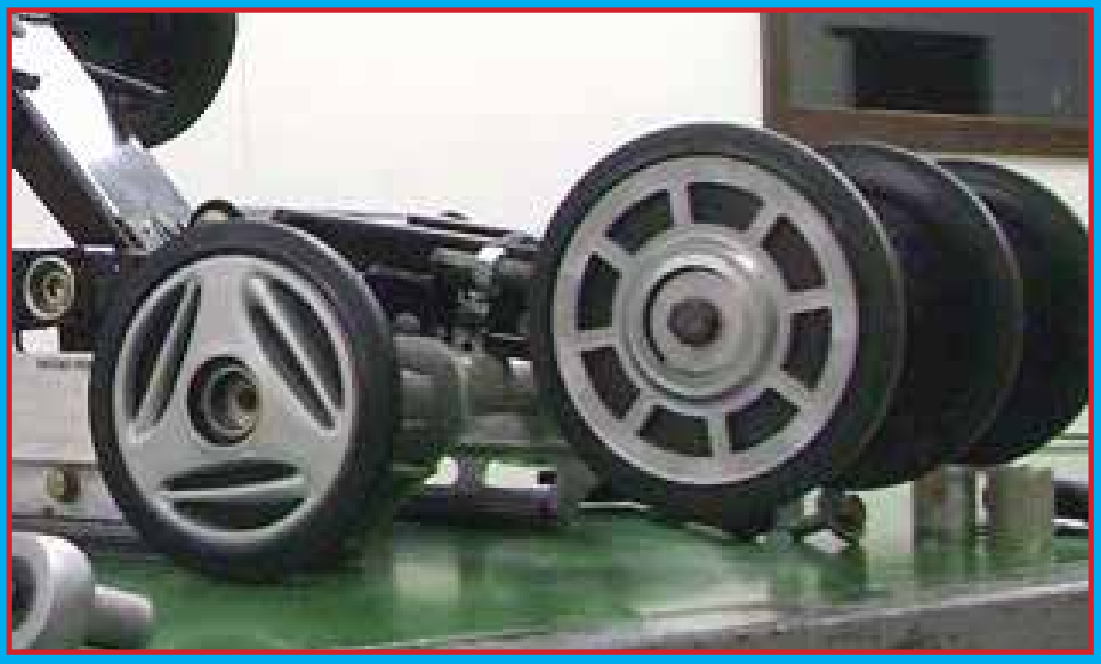
Bilder:
På bilderna ser du en montering av en 384 cm matta.

Montera axeln så långt framåt som möjligt, se bild.
Då får du perfekt och tillräcklig justering.



Bilder:
På bilderna ser du montering av en 403 cm matta.


Montera axeln så mycket åt höger (bakåt) i bilden som möjligt, se bild. Då får du perfekt och tillräcklig justering.
