Benvenuti sulle pagine Web dell' Azienda Teo Lehtimaki Oy

L'Azienda Teo Lehtimaki Oy è una azienda familiare, nata nel 1991.

Vendiamo pezzi di ricambio per le motoslitte. Esportiamo anche i nostri prodotti fuori Finlandia, principalmente negli altri paesi Nordici, nelle Alpi Europee, Estonia e Russia.

Noi importiamo pezzi di ricambio dai produttori di prima scelta come Camoplast, CV-Tech, IBC Canada, PPD Industries, è Garland.

La nostra azienda è flessibile e consegna velocemente. Abbiamo una vasta conoscenza di tutti ricambi dal settore della fabbricazione delle motoslitte sino alla messa sul mercato. Le nostre pagine danno anche aiuti tecnici, istruzioni di installazione e raccomandazioni su come usare i pezzi di ricambi. Vengono aggiornate regolarmente, per incoraggiare Voi a visitarle più spesso.

Catalogo 2008

Nel catalogo, fabbricazioni originali con il loro codice per identificarle correttamente . Il nostro prodotto di ricambio può essere diversa fabbricazione.

Huoltovapaa kytkin nyt suuriin nestekoneisiin. Tässä kytkimessä ei ole kuluvia holkkeja, vipuja tai muita osia, jotka voisivat käytössä kulua. Erittäin toimintavarma.

Kytkimeen voidaan asentaa alkuperäinen starttikehä. Kytkin toimittetaan valmiiksi kalibroituna, ja starttikehän tilalla on teräsrengas, joka tarvittaessa korvataan alkuperäisellä starttikehällä.

Kytkin sai Moottorikelkkalehden testeissä hyvän arvosanan.

Available in January 2008

You can find all calibrations on our web page at:

When the engine is running with full RPM capacity, the spring rate is somewhat higher on the **Blue Spring** than the spring rate of the CVTech spring. The calibration can be adjusted by adding one shim into each block. Remember that one shim corresponds 100 RPM. If the engagement RPM differs from the number of rotations given for the motor, always check the spring adjustment of the driven pulley and the alignment. The performance of the engine is only as good as the calibration of the powerline.

Adjusting

Whenever you install a new clutch or repair the old one, always remember to check driven pulley, tension and condition of the spring. Very often the spring is "dead" and does not do its job.

If the spring in driven pulley is "dead", it allows the clutch to shift too early and the engine has no possibility to run well. Replace or tighten the spring, also you can clean parts but do not use grease.

Powerline

Check the powerline with 12 mm thick iron bar. If there is no rubber stopper to stop the engine turning when using the throttle, then **Y** must be 1,0 - 1,5 mm bigger than **X**. Note also that due to a smaller clutch, the distance **Z** in your service manual does not exist. It is something else, but the difference is acceptable.

All snow mobiles can be extended or changed to your liking. The sky is your limit! However, sometimes you need to consider if the changes are worth the effort. The decision is yours!

Please keep in your consideration that sometimes the original version has higher trade value than the one that has been extended.

Happy snowmobiling!
