**Norge**

*2013-2014*

Uppdaterad 02.10.2013  
Foto: Janne Misikangas

**Teo Lehtimäki Oy er ett finsk familjefirma, som ble grunnlagt 1991. Vi selger reservedeler til sneskootere, og vi eksporterer våre produkter til firmaer i Scandinavia, Alpeområde i Europa, Estland og Russland.**

Vi selger kvalitetsprodukter som er produsert i Finland, og vi formidler reservedeler fra kjente produsenter, som Camoplast, CVTech-IBC Canada, PPD Industries, Garland og Wössner

Vi designer og utvikler egne produkter, eks. den populære brede skiplast "Vuotsolainen" og forlengningsatser som passer til alle skotermerker...

Firmaets virksomhet bygger på fleksibilitet, og raske leveranser.

Vi har lang erfaring, og har reservedeler inne på lager for modeller langt tilbake i tiden. Helt til da de første sneskootere ble levert. På disse sider kan du finne både tekniske råd, monteringsanvisninger, og anvendelses område for ulike reservedeler.

Disse sider oppdateres kontinuerlig, så det lønner seg å besøke sidene nå da.

# Katalog 2013-2014

Uppge alltid tydliga referensnummer. Originalnummer är angivna som referens och avser således ej originaldelar.

## Viktiga noteringar om vevaxelmontering

### Viktigt:

Vid vevaxelmontering hänvisas alltid till tillverkarens verkstadshandbok .

Innan vehusets bultar dras åt, kontrollera att vevaxeln, dess kullager och vevaxeltätningar passats in korrekt i vevhuset .

Innan och efter åtdragning av vevhusets bultförband, kontrollera att vevaxeln lätt kan roteras.

Följ alltid verkstadshandbokens instruktioner beträffande kullagrens infettning/smörjning.

Kullagrens livslängd beror helt på om de smorts på rätt sätt med rätt typ av smörjmedel

### Inkörning:

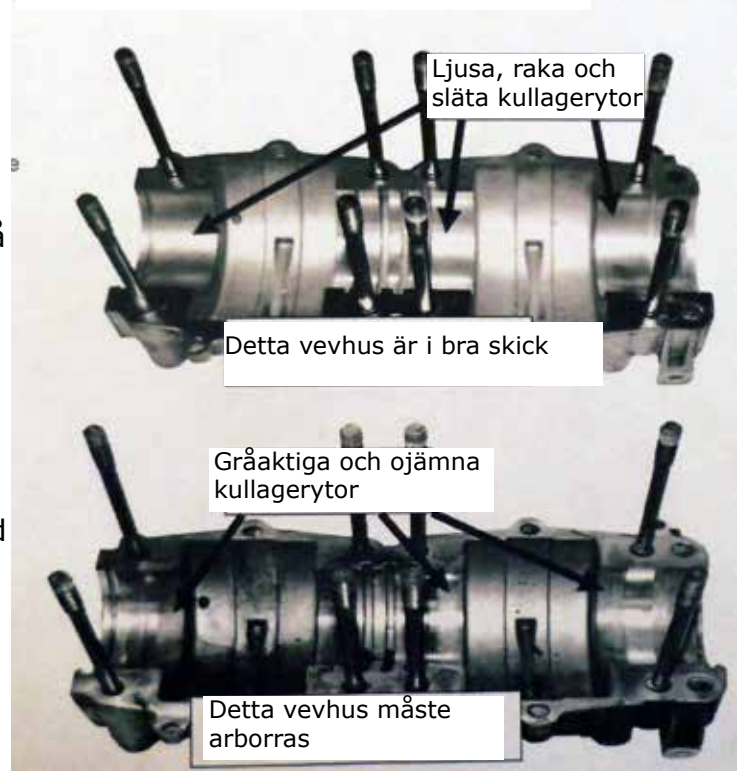

Det finns ingenting viktigare för att få optimal livslängd i en motor än rätt typ av inkörning. Belasta aldrig motorn maximalt under de 10 första timmarna. Kör lungt med varierat gaspådrag. Utsätt aldrig motorn för långa fullgaskörningar och/eller hög belastning. Avbryt körningen om onormalt ljud eller vibrationer uppstår. Analysera och åtgärda orsaken innan körningen fortsätter

### Garanti:

Renoverade standardkomponenter har en garanti om ett år med början från fakturans datum. Komponenterna skall vara monterade av fackkunig och utbildad personal.

## VIKTIG NOTERING

### Vevaxelmonteringsinstruktion

## Boggi fronthjulsats

Stab hjulsats bidrar till att förhindra skador på mattan genom att eliminera risken för att boggiskenornas spetsar kommer i kontakt med mattan

2007-	Yeti, Yeti Pro V-800	800	14-6021	25,0

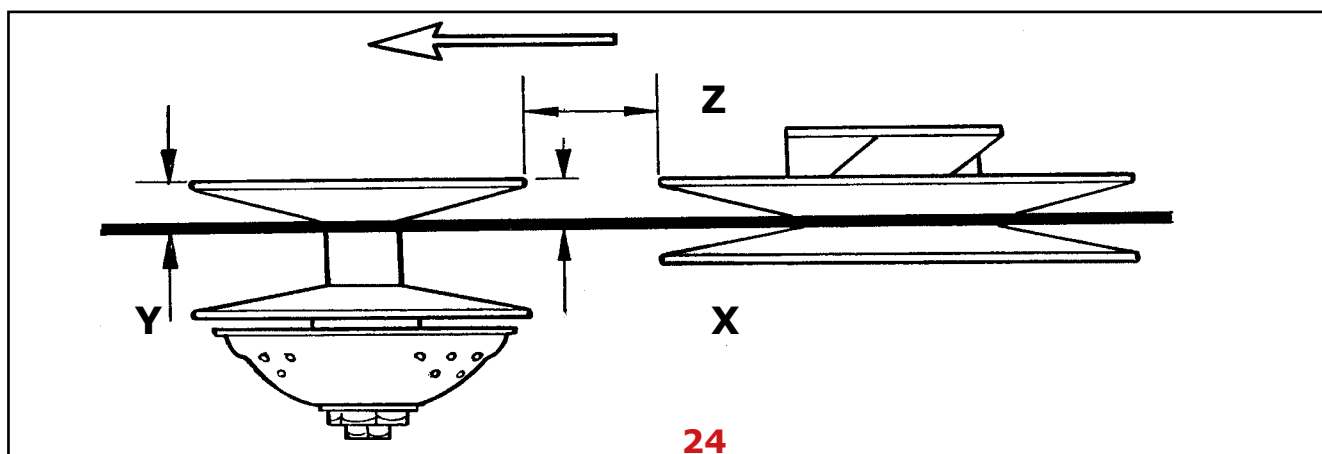

När du har monterat i en ny variator eller reparerat den gamla, kolla alltid fjädern i sekundärvariatorn. Väldigt ofta är den för svag och fungerar inte som den ska.

Den växlar upp för tidigt och växlar ner för sent vilket gör att motorn inte orkar. Därför lönar det sig att spänna den gamla fjädern eller montera dit en ny. Du bör också alltid rengöra delarna.

## Linjering

Kolla variatorernas linjering med en rak stång. Om det inte finns någon vridstopp eller begränsare i din skoter, som hindrar att motorn vrider sig under drift, så måste måttet **Y** vara minst 1,0-1,5 mm större än måttet **X**. Notera också att ny CVTech, IBC är mindre i diameter och därför är ägarhandbokens **Z** mått ej rätt.

# Powerbloc 80

Servicefri variator till stora vätskekylda maskiner. Den är mycket driftsäker och innehåller inga slitande delar. Man kan montera original startkrans.

Variatorn levereras färdigkalibrerad.

Bilden i höger: Samma variator, men den har gått 700 mil. Inget slitage, samma fjäderlängd som i den nya, viktblocken är som nya och skivorna helt korrekta. Den ursprungliga drivremmen med bredd av 35 mm. Summit 600 SDI.

Dessa fjädrar man kan använda också i P80 variatoren

Den blå fjäderns konstant är något högre på maxvarv än CVTech fjäderns. Kalibrering kan ändras genom att lägga till viktbricka i varje viktblock Kom i håg: en bricka motsvarar ungefär 100 varv /min. Om motorns max varvtal avviker det som fabriken angett för den aktuella motortypen bör man även kontrollera sekundärvariatorns fjäderförspänning och variatorernas linjering.

Motorns prestanda blir aldrig bättre än variatorernas kalibrering tillåter.

# Shortblock, kit

Tillgängliga med kort leveranstid

Short block inkluderar:

- Renoverat vevhus
- Nya kolvar
- Renoverad vevaxel
- Ny cylinderbeläggning
- Nya packningar
- Nya kullager
- 0,5 l inkörningsolja
- Slidmatningsaxel (i aktuella fall)
- Notera: Priset inkluderar inte utbytesstommen

## Renoverade vevaxlar

### Arctic Cat, vid förfrågan

Renoverade vevaxlar:

- samtliga kul/rullager
- mittre packboxar
- vevstakar
- riktade enligt originalspecifikationer
- 1-års garanti
- Med kullagerfett (i aktuella fall)

## Nicasil renoverade cylindrar

Den gamla cylindern behövs alltid:

- får inte ha en avbruten nedre foderdel
- får inte vara portad
- får inte vara svetsad

Livstids garanti mot fabriktionsfel

UTILITY

The Camoplast Cobra WT is a no-compromises solution for off-trail work and play.

- Extra tall 1.5" and 1.8" lugs provide optimal traction on and off-trail applications
  - Cupped lugs deliver excellent traction in soft, loose snow and off-trail
  - back country explorations
  - Lightweight for improved efficiency and fuel economy
- High-performance belting pulls heavier loads without track stretching

1.5" lugs provide aggressive traction for crossover riders who prefer on-trail riding

- Longer lengths – 144", 151" and 159" — allow conversion of mountain designed snowmobiles to crossover sleds for on and off-trail use
- Aggressive angled lugs offer outstanding forward and lateral bite on groomed trails "Stepped" lug design allows lugs to provide improved traction in soft, loose snow

Model 9003C

## SOKOSTI

Camoplast har lagt ned sin finländska snöskoterdrivbandsproduktion. Detta innebär att tillverkningen av de drivband som varit unika för de finska och svenska snöskotrarna, har avslutats. Bl.a. Lynx, Winha, Trapper, Nordik och Ockelbo. En sista tillverkningsomgång av dessa drivband har skett under sommaren 2010.

### Lynx 5900 byte av matta samt förlängning på bakparti.

Kapa av röret

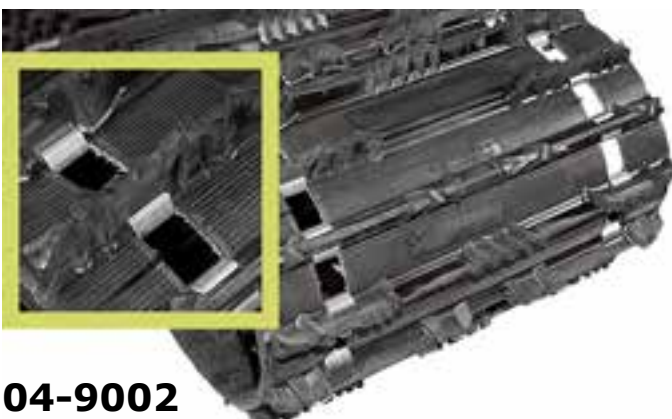

Svetsa ihop med rörbiten  
Rörbitarna levereras med mattan.

Svetsen har gjorts  
Denna skoter har runda bak hjul. Du kan ersätta även de bakre kugghjulen, om det existerar.

Du måste byta även drivhjulen.  
Det är endast möjligt om det finns en sexkantig drivaxel.

**Vi rekommenderar No Slip hjul**
