Maverick

Next generation Mountain Track designed to provide outstanding performance in deep bottomless powder, while maintaining transit capability on hard pack.

NEW

3"

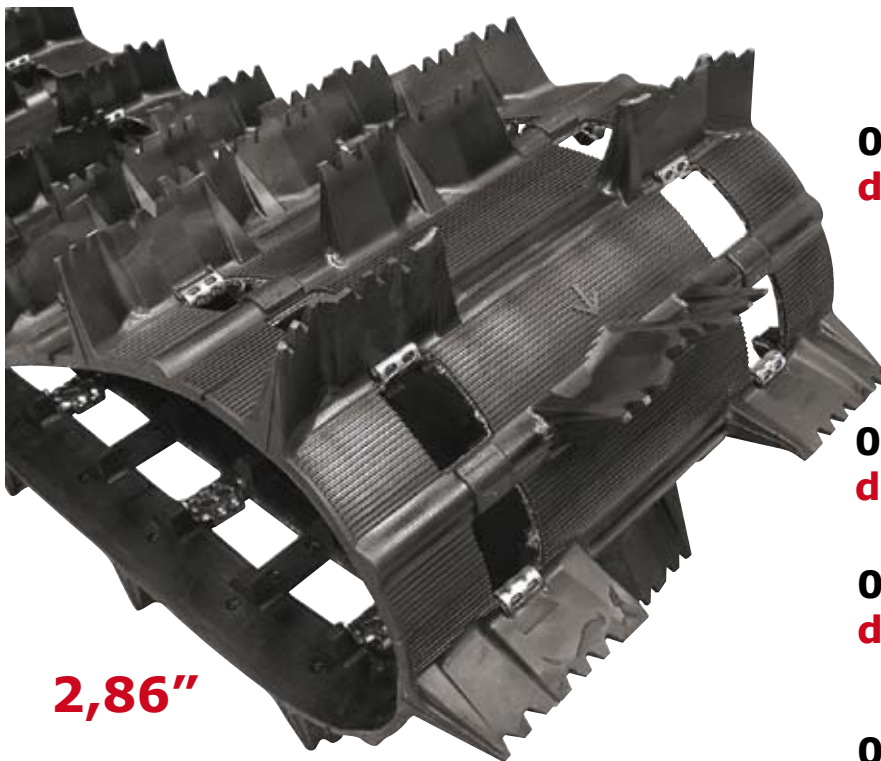

Top portion of profile designed to bend, compacting snow versus "cutting" and trenching, providing optimal performance in powder.

Rigid columns, "fingers" strategically positioned at the ends of profiles provides optimum performance in hard packed snow.

Blåa fjäderns fjäderstandard är något större på maximal varvtalet än CVTech fjäderns. Kalibrering kan ändras genom att lägga till en pricka för varje viktkloss. Kom i håg: en bricka motsvarar ungefär 100 varv /min. Om koppling varvantalet avsevärt skiljer för det, vad man har angett för motorn, granska alltid sekundärvariatorrens fjäderns justering samt linjering av variatorn. Motorn är exakt så bra som kalibrering av variatorn är.

Instruktioner

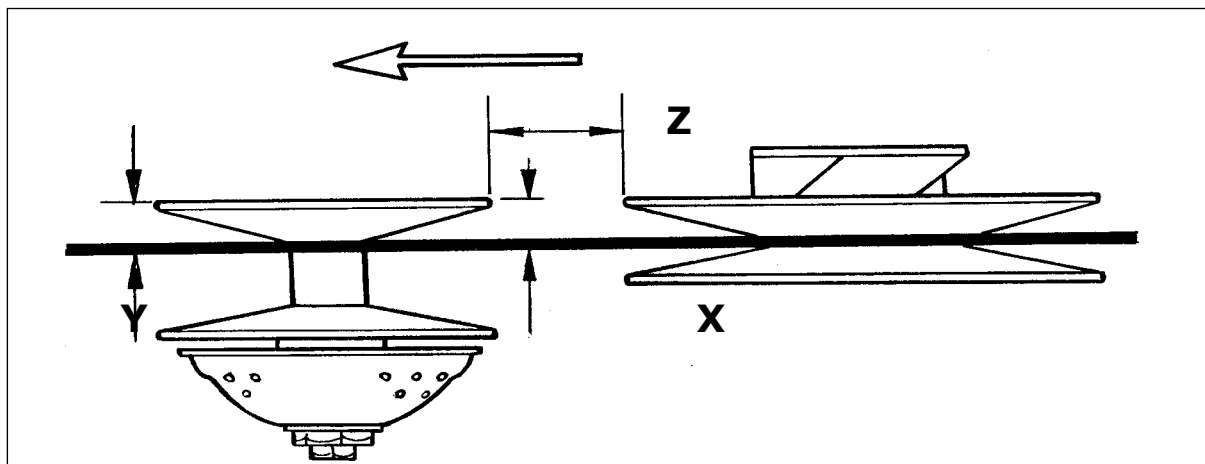

När du har monterat i en ny variator eller reparerat den gamla, kolla alltid fjädern i sekundärvariatorn. Väldigt ofta är den för svag och fungerar inte som den ska.

Den växlar för tidigt och motorn orkar inte. Därför lönar det sig att spänna den gamla fjädern eller montera dit en ny. Du bör också alltid rengöra delarna.

Linjering

Kolla med ett 12 mm tjockt järn eller en rak stång för linjering av variatorerna. Om det inte finns någon vridstopp eller begränsare i din skoter, som kan hindra motorn att vrida sig under drift, så måste måttet **Y** vara ca. 1,0-1,5 mm större än måttet **X**. Notera också att ny CV Tech, IBC är mindre i diameter och därför är manualens **Z** mått ej rätt.

Förstärkningen av bandtunneln

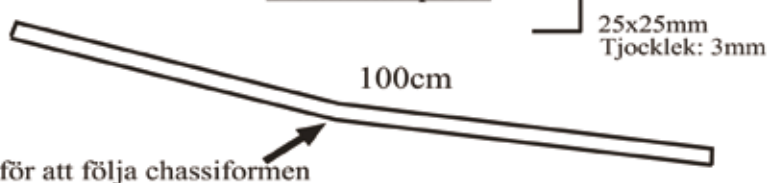

Aluminiumplåt, 3mm tjock

Aluminiumplåten bockas till denna profil (ungefärliga mått):

Aluminiumprofil

Kort beskrivning:

Lastbågarna är flyttade 9 cm bakåt, lyftbågen/draghållaren är flyttad c:a 15 cm, vilket visade sig bli något för lite. Det blev trångt för händerna när man ska lyfta. Förstärkningarnas längd är vald för att nå till och förbi bakre boggieinfästning. Plåt och profil popnitas fast, plus att skruvar från lyftbåge och lasthållare hjälper till.

En tunn gummimatta har lagts på bakersta delen av bandtunneln för att snygga till. Tvåsitsdynan går att montera precis som i originalutförandet.
